

Leonardo DR mini III

The gold standard for medical services, disaster protection and homecare services

The case can be comfortably transported by the **handle** or with the **carrying strap**

Intelligent power saving mode by folding down the monitor → You can continue working immediately within a defined time frame or the system shuts down automatically

The integrated monitor is brought into the working position with a flick of the wrist

Robust, **extremely durable suitcase** made of the latest high-tech composite material with shock-absorbing edge reinforcement, splash-proof (IPX4)

Optional **wireless remote control** of the system via your smartphone using an app

Unbeatable image quality through automatic, intelligent image processing

Very low case weight of only 9.5 kg with large Full HD touchscreen monitor (without detector)

Easy removal of the X-ray detector from the **padded transport compartment**

Sufficient space for all **25 x 30 cm** and **35 x 43 cm** X-ray detectors incl. protection box

Anti-glare 21.5" (54.6 cm) Full HD touchscreen monitor for large X-ray images and comfortable diagnosis

USB connection

Optional **accessory bag** for transport-safe packaging of spare batteries, chargers, etc.

Intuitive operation via *dicomPACS® DX-R* acquisition software with **integrated radiographic positioning guide** for each examination incl. comprehensive notes, photos, videos etc.

Power pack can also be operated with **external power pack** without batteries

Status display of the overall system in 4 colours for direct visualisation of the workflow

Standard PC keyboard

Replacing the batteries during operation, no need to shut down the system

Integrated diagnostic software offers a worldwide, fast and cost-effective exchange of information (via cloud or email)

System enables continuous, **cordless work for 8 hours with up to 500 X-ray exposures** (in double-battery operation; 18 Volt / 5 Ah)
