

XenOR - The art of digital X-ray

Published: 17 November 2016

OR Technology's **XenOR** product line is an exciting addition to the array of X-ray detectors already on offer.

The **XenOR** series is available with wired and wireless X-ray detectors in various sizes.

The most important benefits of **XenOR** X-ray detectors:

- Auto exposure detection (AED) – no need for adjustments in the X-ray unit
- Excellent image quality due to high detective quantum efficiency (DQE)
- „CsI direct deposit“ technology optimises digital signal processing and guarantees excellent image quality at low dose
- Advanced CsI screen: significantly thicker CsI screen and improved noise reduction compared to other low budget X-ray detectors
- Sturdy casing
- 36 months warranty
- Extremely cost effective
- Lightweight

On the surface, **XenOR** X-ray detectors are distinguished by their artistic design: „The art of digital X-ray“. Four different one line drawings were created by the Rostock artist Felix Fugen Zahn to adorn the models of the **XenOR** series exclusively. The subjects, inspired by nature, sports and architecture, make the exterior of our **XenOR** detectors more attractive and may even appeal to some art lovers.

Further specifications and technical details for all **XenOR** models are available on our fact sheets. Please contact info@or-technology.com.
